

Cyberframe116.com

(Short Pitch)

Cyberframe116 is a ragtag team of certified idiots specialized in breaking products.

(Long Pitch)

Cyberframe116 provides unique and out-of-the-box testing to different products. A prototype motorcycle in development? We will try anything and everything to see if your moped endures our unconventional methods. New cell phone model your engineers spent months working on with blood, sweat and tears? We will brick the phone, both figuratively and literally. Nothing is more idiot proof than three room temperature IQ potatoes dwelling in a basement.

(Personas)

Robotic Fighting Club

Better have robots breaking now than later.

Stuffed 'Smart' Toys

Testing material quality and endurance.
